Conformity

Sharps containers

NF ISO 23907
NF X30-511

NF X30 511 is a French requirements for sharps containers. ISO 23907 is an international standard for sharps containers

ADR / UN 3291

This is an European regulation for dangerous goods transportation

Pockets

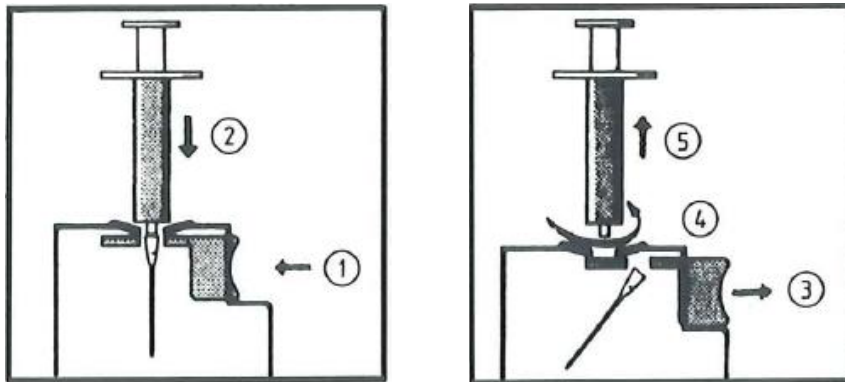

Sharps containers

Our POKETS sharps containers have been designed to assist medical staff in the field.
Because of their size, POKETS can be put into a first aid kit for instance.

POCKET 0.20 L / ST03821

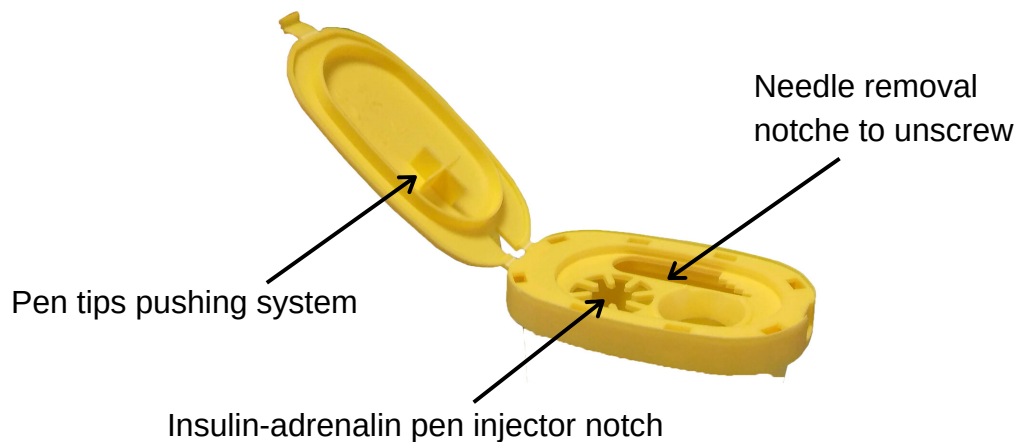

Automatic shutter immediately isolates soiled objects while ensuring safety of the caregiver.

POCKET 0.25 L / ST03825

Tamper-proof pocket collector is used for transportation and disposal of piercing objects (OPCT).

In addition, this collector has a special notch for insulin pens

PAROLAI STIL'ECO commercial team is dedicated to your needs from testing phase to the installation to your services. We will support you during all the installation phase of our sharps containers.

Because your safety is our top one priority, we will provide technical datasheets, illustrated instructions and videos, to remind you good practices to adopt.
